Salesman _____

IF SPECIFICATIONS WERE WRITTEN FOR THIS PROJECT, PLEASE SUBMIT ONE COPY WITH THE APPLICATION

NOTE: THESE PRODUCTS ARE NOT INTENDED TO BE USED OVER GRAVELED SUBSTRATES

FOR ELASTOMERIC ACRYLIC (A-SERIES) Application: Spray Roller

Type of Existing Substrate: Aged Smooth BUR (over 5 yrs old) Aged Hypalon (over 5 yrs old) EPDM

Metal New PUF Smooth Mod Bit Granulated Mod Bit New Smooth BUR (less than 5 yrs old)

Granulated Mineral Surface & Mineral Surface Cap Sheets Skylights Masonry Walls

THIS BUILDING IS Commercial Industrial Institutional Residential (Material Warranties Only)

BUILDING USE _____ **BUILDING HEIGHT** _____ ft. **NUMBER OF LEVELS** _____

SLOPE _____ Inch per ft. New Roof Re-roof **SIZE OF COATED AREA** _____ Square ft.

PROJECT START DATE _____ **PROJECTED OR ACTUAL COMPLETION DATE** _____

WARRANTY FEE INFORMATION	TYPE	PRICE/S.F.	SIZE(S.F.)	COST
Material Only *	5 Years	N/A	_____ =	NO CHARGE
System Warranty* (Metal Roof Only)	5 Years	\$.04	_____ = \$ _____ (MIN \$300.00)	
Material Only **	10 Years	N/A	_____ =	NO CHARGE
System Warranty** (Metal Roof Only)	10 Years	\$.07	_____ = \$ _____ (MIN \$500.00)	

* Elastomeric Acrylic Application must be applied at a minimum of 2 gallons per square

**Elastomeric Acrylic Application must be applied at a minimum of 3 gallons per square (2 coat minimum)

SEE PRODUCT CHART ON THE BACK OF THIS FORM FOR FURTHER DETAILS ON THE APPLICATION OF COATINGS

INSTALLATION

TOTAL INSTALLATION COST: _____

Materials Used: Primer _____gallons

Flashing Grade _____gallons

Finish Coat _____gallons

MULE-HIDE REQUIRES THAT ALL MATERIAL INVOICES BE SENT WITH THIS APPLICATION

LIST DEVIATIONS TO PUBLISHED SPECIFICATIONS OR CONDITIONS REQUIRING SPECIAL CONSIDERATION _____

Warranty applications must be sent in for approval before the start of the project. Requests for final inspection must be received within 30 days of roof completion. Warranties must be executed within 90 days of roof completion. Any warranty issued by Mule-Hide Products Co., Inc. will be based upon the accuracy and completeness of the information contained in this warranty application, roof drawing and pre-job survey.

PRODUCT APPLICATION CHART

Finish Coating Products:

- A-300 = FINISH (Standard)
- A-320 = FINISH (over asphaltic substrates)
- A-350 = FINISH (over ponded water areas)
- A-301 = SKYLIGHT FINISH
- A-400 = MASONRY WALL COATING

Companion Products:

- 115 = CLEANER
- A-125 = METAL ROOF PRIMER
- A-200 = FLASHING GRADE
- A-151 = EPDM ReSurface Agent™

Specialty Products:

- LIQUI-THIX® - turns A-300 into A-200
- FAST-CAPST™ - stop metal roof fastener leaks
- SEAL FAST™ TAPE - stops leaks, compatible with coatings
- A-300-FF - FAST FILM FINISH when rainfall is expected*
- *Applied by Airless Sprayer Only

IMPORTANT NOTICE FOR ALL SYSTEMS: An ADHESION TEST should first be performed to ensure compatibility between the coating and substrate. Mule-Hide also recommends a two (2) coat application. If required finished coverage rates exceed 2 gals. Per 100 sq. ft, 2 coats are required.
(SEE NOTES BELOW)

Existing Substrate	Finish Coating	Finished Coverage Rate	Warranties Available	Companion Products	Important Remarks

**Must be applied by a Mule-Hide Warranty-Eligible Coatings Contractor						

IMPORTANT NOTES (Details and information subject to change):

When applying coating over an existing roofing system under warranty, the building owner should check with existing roofing system manufacturer, as this coating application may void warranty. Roofing system must be sound and A-350 must be used on areas where ponded water occurs. This information herein should not be considered all-inclusive and should always be accompanied by good application practices. Mule-Hide is NOT responsible for any defects in the existing roofing system. The applicator has sole responsibility for the quality of application of the coating system. Mule-Hide requires proper surface preparation of the existing roofing system. To repair blisters, splits, and other roof surface defects, Mule-Hide recommends that they be repaired in accordance with the published NRCA Repair Manual for Low-Slope Roofing System guidelines prior to application of Mule-Hide Elastomeric Coatings.

Cool temperatures and high humidity retard curing. Do not apply Elastomeric Acrylic Coatings if weather conditions will not permit complete cure. Mule-Hide Coatings are NOT intended for use over graveled surfaces (Spurred Roofs are also NOT acceptable.) Refer to Mule-Hide Coatings Specification Manual for details prior to application. For winter applications and for application over certain existing roof systems, contact Mule-Hide for specific product recommendations. Mule-Hide recommends ADHESION TESTS PRIOR TO COATING to ensure compatibility between the coating and the substrate. Mule-Hide also RECOMMENDS a two (2)-coat application. If finished coverage rates exceed two (2) gallons per square, 2 coats are REQUIRED. Product blisters may occur if coatings are applied too thick in high temperatures. The information herein is based upon data and knowledge considered to be true and accurate and is provided for the applicator's consideration, investigation, and verification. However, Mule-Hide Products Co., Inc., does not warrant any results to be obtained. Statements concerning possible use of Mule-Hide products are made without knowledge of your particular roof and/or coatings project and such an application may not be fit for your particular purpose. MULE-HIDE DISCLAIMS ALL WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, except written warranties attached to Mule-Hide products and written warranties signed by an officer of Mule-Hide.
