Inseam Tape

Designed to improve the quality of EPDM seams and dramatically increase the speed of application.

Tape Primer required prior to application.

Available in 3" or 6" x 100 lf and 3" x 25 lf rolls

Fast EPDM Tapes & Accessories
from the company that brings you Fast Roofs!

EPDM Tapes

Compared to solvent-based adhesive seaming and flashing, these Mule-Hide EPDM Tapes reduce VOC's by 60% or more. Only a small amount of solvent-based Tape Primer is needed during the application of these fast, easy, and strong tapes.

- **Less Labor, Less Time** - Eliminates the wait time that solvent-based liquid adhesives need to flash off.
- **Tape Primer** - must be used in conjunction with all Mule-Hide pre-taped products.
- **Easy Application** - fewer steps...simply clean/prime, position tape, remove release liner, and roll with a 2" steel roller.
- **Excellent Peel and Shear Strength** - provides a consistent thickness and width of seam "adhesive", eliminating the guesswork of liquid adhesives. Tape strength actually improves with age... for less callbacks.
- **Other Labor-saving Products** - Premolded Pipe Boots with Tape, Pre-Cut Corners with Tape, and Reinforced Membrane Strips with Tape, and Pourable Sealer pockets with Tape. (See other side)

Uncured Flashing Tape

This tape is an "uncured" EPDM flashing membrane laminated to seam tape. Ideal for corner flashings, field fabricated pipe flashings, and other details requiring an uncured moldable flashing material.

Tape Primer required prior to application.

Available in 12" x 100 lf and 6" or 12" x 25 lf rolls

Cured Cover Tape

This "cured" tape is used to strip in edge metal, cover exposed batten bar, and as a seam cover typically required in longer term warranted systems. Also used as patching material for repairs.

Tape Primer required prior to application.

Available in 6" or 12" 100 lf rolls

Companion product Tape Primer

This solvent-based primer is used to clean and properly prepare the surface of the EPDM membrane prior to application of all Mule-Hide EPDM pre-taped products.

Available in 1 gal. and 5 gal. cans.

EPDM Premolded and Pre-taped Accessories

Premolded EPDM Pipe Boots with Tape
Used for pipe flashings and penetrations just prime, remove release liner, stick, and caulk edges.
Tape Primer required prior to application.
Available in black or white 1"-6" with clamps & tape rings.

Pre-Cut Corners (Inside/Outside) with Tape
Corners are easy with these pre-taped and pre-cut corners. Offering performance you can count on and can also be used for T-joint patches.
Tape Primer required prior to application.
Available black 7" x 9".

Pourable Sealer Pockets with Tape
These pockets (pitch pans) allow easy field fabrication versus metal.
Tape Primer required prior to application.
Available black 4", 6", or 8".

Companion products
Pourable Sealer
This two-part sealer is easily mixed in the field and poured into our Pourable Sealer Pockets.
Available in handy kit.

Tape Primer
This solvent-based primer is used to clean and properly prepare the surface of the EPDM membrane prior to application of all Mule-Hide EPDM pretaped accessories.
Available in 1 gal. and 5 gal. Cans.

RMS (Reinforced Membrane Strips) with Tape
This 6" Reinforced Membrane Strip is pre-taped for fast and easy application. Reduces installation time since no splice adhesive is needed.
Tape Primer required prior to application
Available in 6" x 100 lf rolls

The story behind the Mule-Hide name...

A four-horse wagon was stuck in the mud. To help out, another driver hitched two more horses, but the wagon was still stuck. Then a wagon with two mules came by and the men replaced all six horses with the mules. The two mules dug down & pulled the wagon out. Their impressive strength was the inspiration for the name that has been trusted in roofing since 1906.
